

## Description

### Joint

Designer: CDC  
Typology: Table  
Year: 2015

### Description:

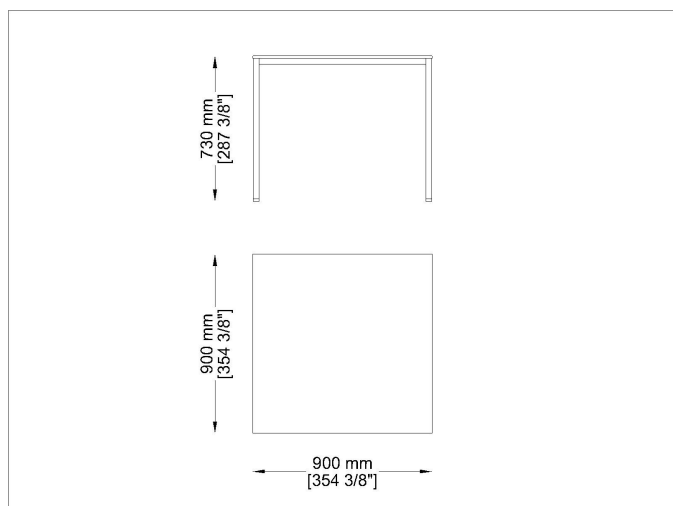

The shapes of the outdoor furniture design become real expressive codes of the human desire to live the dimension of relax and life in open air. The Joint Table is designed to meet every needs by reinventing and recreating itself through multiple dimensions. The stainless steel structure is joined by a special hidden juncture, which transforms our dinner for two into a joyful banquet table. This model is a modular designed by our technical office; replacing two legs of the table with two joining legs it is possible to join two or more tables forming linear compositions in the shape of T, U and other solutions.
